

# Sri Ramachandra Raju Buddhharaju

Senior Salesforce Developer & Technical Lead | Sales Cloud · Service Cloud · AI Integration

+91 8523080380 | siddhubuddharaju@gmail.com | Hyderabad, India | LinkedIn | github.com/Sribuddharaju

## ★ PROFESSIONAL SUMMARY

Salesforce Technical Lead and Architect with **8+ years** delivering enterprise Sales Cloud and Service Cloud solutions for **Fortune 100 companies** including Cisco, HPE, and Deloitte clients. Currently leading a 7-member team at **Cisco ThousandEyes**, where I drove a multi-org consolidation impacting **800+ users**, built a metadata-driven UI framework eliminating UI deployment overhead, and developed AI-powered developer tools that reduced average debug time by **~65%**. **10x certified** (including AI Specialist & Scrum Master) with hands-on architecture skills in Apex, LWC, custom metadata patterns, enterprise integrations, and Agentforce-era AI tooling.

## ▲ KEY ACHIEVEMENTS

- Led **One Cisco One Experience migration** — consolidated processes across 3 Salesforce orgs, unifying workflows for **800+ users** and eliminating ~40% of cross-team handoff delays
- Architected **metadata-driven Opportunity UI** with 100+ CMDT records — reduced page configuration changes from multi-day dev cycles to **minutes of admin-only config**, cutting UI deployment tickets by ~85%
- Built **AI sprint execution platform** (Next.js/TypeScript) used by **15+ developers**, reducing average story-to-code cycle time by ~40% through LLM-assisted code generation and automated testing
- Deployed **Service Cloud & Enhanced Messaging** handling **2,000+ monthly cases** and **150+ daily chat sessions** with 98% SLA compliance at ThousandEyes

## ⚙️ TECHNICAL SKILLS

|              |                   |                   |                  |                    |                        |                |                 |                 |             |
|--------------|-------------------|-------------------|------------------|--------------------|------------------------|----------------|-----------------|-----------------|-------------|
| Salesforce   | Apex              | LWC               | Aura             | Flows              | SOQL/SOSL              | Triggers       | Custom Metadata | Platform Events | CDC         |
|              | Visualforce       |                   |                  |                    |                        |                |                 |                 |             |
| Clouds       | Sales Cloud       | Service Cloud     | Experience Cloud | Enhanced Messaging | Agentforce             | Data Cloud     |                 |                 |             |
|              | DevOps Center     | CPQ               |                  |                    |                        |                |                 |                 |             |
| AI & Tooling | Cisco Circuit LLM | Cursor IDE        | Einstein AI      | Prompt Engineering | Vector/Intent Indexing | LibreTranslate |                 |                 |             |
| Integrations | REST/SOAP         | Tooling API       | Conversation API | Jira               | Amazon S3              | Webex Bot SDK  | GitHub API      |                 |             |
|              | Confluence        | Named Credentials |                  |                    |                        |                |                 |                 |             |
| DevOps       | SFDX              | DevOps Center     | Copado           | Git/GitHub         | GCP                    | Docker         | CI/CD           | Playwright      | Scrum/Agile |
| Languages    | Apex              | JavaScript        | TypeScript       | Python             | SQL                    | HTML/CSS       | Java            |                 |             |
| Frameworks   | Next.js 14        | React 18          | Tailwind CSS     | shadcn/ui          | jsforce                | Node.js        | Firestore       |                 |             |

## ◆ PROFESSIONAL EXPERIENCE

- Senior Salesforce Developer & Technical Lead (SDE 4)** Feb 2024 – Present  
**Cisco Systems India Pvt Ltd — ThousandEyes · Hyderabad**  
*End-to-end Sales & Service Cloud architecture for ThousandEyes (800+ users). One Cisco One Experience migration, AI-assisted tooling, and cross-org integration.*
  - Lead a **team of 7 developers** across 3 scrum squads, delivering **35+ user stories per sprint** with consistent on-time release cadence across Sales and Service Cloud
  - Drove **One Cisco One Experience migration** — consolidated ThousandEyes into Cisco's unified Salesforce architecture across **3 orgs**, standardizing processes for **800+ users** and reducing cross-team handoff delays by ~40%
  - Migrated triggers and classes to a **common factory pattern framework** across **15+ sObjects**, reducing duplicate trigger logic by ~60% and cutting regression defects by ~30%
  - Built **Centralized Data Exchange** — hub-and-spoke integration platform syncing **200K+ records** bi-directionally across multiple Salesforce orgs with near real-time latency

## ► Service Cloud — Case Management & Enhanced Chat Deployment

Apex · LWC · Flows · Omni-Channel · Enhanced Messaging · Conversation API

- Implemented **Service Cloud case management** handling **2,000+ cases/month** — assignment rules, escalation policies, entitlement processes, and SLA milestones achieving **98% SLA compliance**
- Deployed **Enhanced Chat (Messaging for In-App & Web)** with Omni-Channel routing, handling **150+ daily conversations** and reducing average first-response time by ~35%
- Built an **agent messaging LWC with real-time translation** supporting **12+ languages** — auto-detects language via LibreTranslate, shows English to agents, and converts replies to the customer's language
- Integrated **Conversation Data API** and **Flow-backed Send Message actions** for agent reply orchestration with 4-second polling, reducing manual agent context-switching by ~50%

## ► Salesforce-Jira Integration

Apex · REST API · Named Credentials · Platform Events

- Developed **Salesforce-to-Jira REST integration** automating **200+ issue links/month** — agents create, link, and track Jira issues directly from Cases, saving ~12 hours/week of manual data entry
- Implemented bi-directional status sync and comment mirroring using **Named Credentials** and webhook-based event handling with **99.5% sync reliability**

## ► SFDC Command Center — AI-Powered Sprint Execution & Org Intelligence

Next.js 14 · TypeScript · React 18 · Tailwind · jsforce · Firestore · Playwright · Webex Bot SDK · Cisco Circuit LLM

- Built a **full-stack sprint execution platform** (Next.js 14 / TypeScript) used by **15+ developers** — integrates User Stories with AI-powered solution generation, reducing average story-to-code cycle time by ~40%
- Implemented **dual-strategy code search** indexing **18K+ metadata components**: Fast Search (metadata agent) and Deep Search (vector + exact + intent retrieval) with incremental and full indexing pipelines
- Built **Org Explorer** using Tooling API — metadata dependency graph with progressive expansion, permission analysis, and Flow version-aware dependency tracking across **500+ Flows**
- Developed **Webex bot integration** (enhance story, test story, chat) with strict prod/sandbox session routing — processing **100+ bot interactions/week** across the team
- Implemented **automated story testing via Webex**: classifies as UI or backend, executes with **Playwright**, captures screenshots, and posts results — cutting manual QA effort by ~30%
- Created **central prompt registry** with per-user Firestore overrides and **3-tier model routing** (premium / mid-tier / nano), reducing LLM API costs by ~45% through intelligent model selection
- Built **AI token usage analytics** — per-user tracking, daily rollups, and team leaderboard providing full cost visibility across **50K+ monthly API calls**

## ► AI Debug Assistant — Cisco Circuit LLM & Cursor IDE

Apex · LWC · Cisco Circuit LLM · Tooling API · REST Callouts · Named Credentials

- Built an **AI Debug Assistant LWC** reducing average debug time from ~45 min to ~15 min (~65% reduction) — captures debug logs via Tooling API, sends to Cisco Circuit LLM via OAuth2 REST, returns plain-language root cause analysis
- Implemented **multimodal screenshot analysis** — LLM processes both text logs and attached images for richer diagnostics, resolving ~20% more edge cases than text-only analysis
- Designed **log chunking strategy** handling logs up to **20 MB** — full content for small logs, head/tail extraction for large ones to stay within token limits
- Added **incident ticketing workflow**: agents raise requests with debug logs as ContentVersion attachments, reducing incident creation time from ~10 min to ~2 min

## ► Metadata-Driven Opportunity UI Framework

Apex · LWC · Custom Metadata Types · Formula Evaluation

- Architected **fully metadata-driven Opportunity page** — **100+ CMDT records** controlling layout, sections, buttons, headers, and visibility rules with zero hardcoded logic, cutting UI deployment tickets by ~85%
- Built **formula-based visibility engine** in Apex (AND, OR, ISPICKVAL, ISBLANK) and JSON criteria with field-level security allowlists — evaluating **30+ dynamic rules per page load** in <200ms
- Designed reusable shell LWCs: **FlexiPage** → **Wrapper** → **Shell** → **Apex Service** → **CMDT** — new fields/stages added via metadata only, enabling **admin self-service for 90% of UI changes**
- Migrated **25+ legacy workflows** to optimized Flows and Apex, improving process execution time and reducing maintenance overhead

- Developed integrations with **Amazon S3, GitHub, and Jira**; architected **Salesforce DevOps CI/CD pipelines** using DevOps Center and GitHub, achieving **2 production releases/week**

## ● Salesforce Technical Lead — Service Cloud

Mar 2023 – Feb 2024

**Hewlett Packard Enterprise India Ltd · Hyderabad**

*PAN HPE Service Cloud — multi-tenant architecture serving 1,200+ users across PSA, Field Service, Case Management, and SaaS PMO.*

- Led a **team of 9 developers** for HPE's largest Services application (Premier OS), managing **400+ active cases/week** across PSA and Falcon tenants
- Implemented **multi-tenant Service Cloud** in a single org — PSA (project management), Field Service (work orders), and Case Management serving **1,200+ internal users** across 4 business units
- Developed **no-code automations using Flows**, replacing **~70% of legacy Apex triggers** and reducing maintenance effort by ~25 hours/sprint
- Owned **deployment and release management** — delivered **8–10 production releases per sprint** with Git-based CI/CD and zero rollback incidents over 6 months

## ● Salesforce Developer / Consultant

Oct 2021 – Mar 2023

**Hewlett Packard Enterprise India Ltd · Hyderabad**

*IPFolio managed package for IPAS & Legal teams — patent tracking and IP management.*

- Built end-to-end **IPFolio managed package** tracking **3,000+ patents and IDFs** across HPE Legal, reducing patent lifecycle tracking from spreadsheets to a unified Salesforce experience
- Integrated with **Power Apps** for patent review workflows; built **REST APIs serving Python analytics dashboards** used by **150+ legal team members**
- Developed **20+ custom LWC and Aura components** with extensive Flow-based automation, cutting manual data entry by ~50%

## ● Salesforce Developer / Consultant

Apr 2018 – Oct 2021

**Deloitte · IBM India · Tech Mahindra · India**

*Sales Cloud implementations across enterprise clients — BPCL, Vodafone Idea, Vodafone India.*

- **Deloitte / BPCL (2021)**: Developed Sales Buddy application on Sales Cloud — lead tracking, opportunity management, and campaign workflows managing **8,000+ leads**
- **IBM / Vodafone Idea (2020–2021)**: Delivered Lightning Aura components and Apex customizations for Sales Cloud; led requirement gathering and impact analysis with stakeholders
- **Tech Mahindra / Vodafone India (2018–2020)**: Executed end-to-end **Siebel-to-Salesforce CRM migration** — migrated **500K+ customer records** using Data Loader and Oracle SQL; transitioned from Siebel Administrator to full Salesforce development

## ✓ CERTIFICATIONS

 Salesforce Certified AI Specialist

 Salesforce Certified Platform App Builder

 Salesforce Certified AI Associate

 Claude Code in Action — Anthropic

 Salesforce Certified Platform Developer I

 Salesforce Certified Administrator (SCA)

 Professional Scrum Master (PSM) — Scrum.org

 Copado Certified (Extension Builder, Robotic Testing, Fundamentals I & II)

## ◆ EDUCATION

**Bachelor of Technology — Mechanical Engineering**

Jawaharlal Nehru Technological University, Andhra Pradesh
